

Navman Wireless Vehicle and Asset Management Solutions

Navman Wireless is one of Australia's market leading provider in GPS Tracking & Fleet Management solutions.

Navman Wireless Solutions include:

- Vehicle & Fleet Tracking System
- Messaging & GPS Satellite Navigation with Tracking
- Messaging and Tracking Solution for Job Dispatching
- Telemetry Solution with Vehicle Tracking
- Engine Management System

The Navman Wireless solutions provide users with real-time and historical visibility of their vehicles utilising GPS satellites and Telstra's cellular network.

With Navman Wireless GPS Fleet Management and Vehicle Tracking solutions, you'll see time and money saving benefits from the moment you install the system. In addition to real-time visibility of your fleet, you'll have a more productive team that works efficiently. And you'll enjoy a positive return on your investment.

Think about how much time and money you would save if you could see, track and manage your fleet vehicles in real-time. You can do all this and more with Navman Wireless - the vehicle fleet management solution that takes the guesswork out of vehicle location, job dispatching, job scheduling and driver behaviour.

Reduce Costs

Enjoy lower fuel costs and communication costs, less vehicle wear and tear, eliminate unauthorised vehicle usage and 'cashie jobs' and see fewer timesheet and billing discrepancies.

Visibility

Because you can see all your fleet vehicles at the same time, you can send the nearest vehicle to a job and send it by the most direct route using the GPS satellite navigation device.

Productivity

With Navman Wireless ability to help you improve scheduling, you can reduce downtime, optimise the use of fleet vehicles and complete more jobs in a day.

Customer Service

Become a trusted partner of your customers by providing more efficient service, more accurate ETAs and more accurate invoices.
